

Company: INGEBORG KUMPFMÜLLER

Project: Borealis Innovation Headquarters Linz

Colors: white, two shades of grey

The company's various areas of activity are localized on the concrete downstand beams – a reaction to a strong architectural feature.

In this way the individual sections of the company in the building are clearly identified and easy to find.

External presentation: the company name, in the form of a sculpture, points the way to the building.

The entrepreneurial value "exceed" is thus already illustrated outside the building.
